

It is the policy of the Town of Northfield that any applicant granted a road opening permit must repair the road to the standard that follows:

- Every one foot of dry soil or less compacted.
- Subsoil brought up to within 22 inches of the surface.
- One foot of bank run gravel or equivalent.
- Six inches of processed gravel or an equivalent.
- Two inches of compacted base material Blacktop.
- Two inches of compacted Mass State mix Blacktop

The road and the lawns must be replaced to the same or better shape than when the project was started.

Superintendent of Roads
